Amiya and Material Automation (Thailand) form Business Alliance in Thailand Introducing ALog ConVerter to the Thai Market

Amiya Corporation (Tokyo, Japan; Seiichi Ito, CEO) and Material Automation (Thailand) Pte. Ltd. (Thailand; Makoto Yoshida, CEO) announced a formal agreement for Amiya and Material Automation (Thailand) to sell and support Amiya’s ALog ConVerter, a server access log management tool in the Thailand market.

Amiya Corporation is the inventor of ALog ConVerter, a server access log management tool that plays a vital role in corporate data security and risk management in Japan and the rest of Asia. This time, Amiya chose Amiya and Material Automation (Thailand) as the company’s partner in Thailand where there is an potential demand for security in the market, recognizing Amiya and Material Automation (Thailand) ’s strong sales channel and technical support capabilities that will contribute to ALog ConVerter growth.

ALog ConVerter is the standard among server access log management programs, awarded the Gold Prize in the Info Security Products Global Excellence Awards 2013, Products and Solutions for Asia-Pacific categories. More importantly, ALog ConVerter has been adopted by more than 2,600 corporations around the world, highly regarded for its effectiveness and ease of operation.

Says Makoto Yoshida, CEO of Material Automation (Thailand) , " It would be our great pleasure to add Amiya Corporations ALog ConVerter, which is the Japanese market shares No:1 server access log management software to MAT Security Solutions product Line Up. We will put our best effort to expand the shares of ALog in Thailand market while contributing to solve the IT security related issues and problems by ALog solution of our customers in Thailand."

Seiichi Ito, CEO of Amiya Corporation, adds, “We believe this partnership with Amiya and Material Automation (Thailand) that garners immense praise for providing IT service will open up more distribution channels for ALog ConVerter in Thailand where there is an potential demand for security in the market. We expect Thailand’s decision-makers to embrace ALog ConVerter with the same kind of reception this software has received in Japan. We look forward to offering Thailand enterprises and Japanese enterprises which have Thailand branches our solutions that increase their security environment.

What is ALog ConVerter?

Released originally in September 2005, ALog ConVerter is an agentless (non-resident program) access log management tool. ALog ConVerter takes a server event log and looks for file access, domain logins, and other activity, providing all-in-one proprietary analysis and file compression for long-term storage. It realizes low cost and efficient log management as ALog ConVerter collects log data from the server side where the vital data is stored. ALog ConVerter has been adopted by more than 2,600 corporations
